Species Election

This application encompasses two species of the inventive subject matter, as shown, for example, by Figures 2 and 4 respectively. These species are independent and/or distinct inventions because they constitute alternative configurations for a flow passageway system, each configuration representing a complete and separately usable device. Pursuant to 35 USC 121, applicant is required for a complete response to (1) elect a single disclosed species and (2) list all claims readable on the elected species including any claims subsequently added (MPEP 809.02(a)).

Claim 8 appears to be generic.

Applicant is further advised that a mere argument alleging that a generic claim is allowable will not satisfy a species election requirement. For a complete response, applicant must elect a single species and list the claims readable on that species as set forth above. (The undersigned was unable to make contact with applicant's attorney for the purpose of offering the option of a telephone election, hence, this action is being made as a written election requirement.)
